Capturas de pantalla del Ejercicio Analisis Resultados

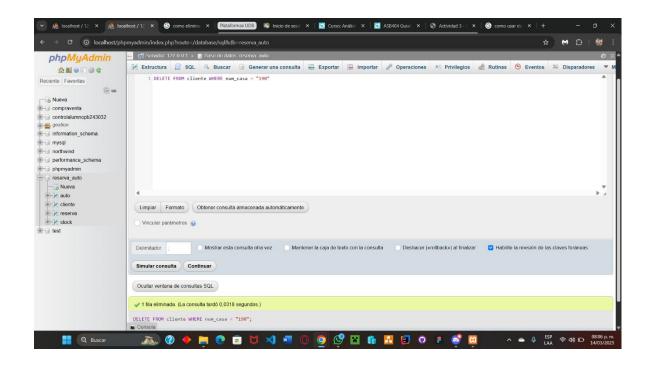

Por último, para sustituir la consulta de SQLServer:

(SELECT company

FROM customers

WHERE company LIKE "[a-c]")

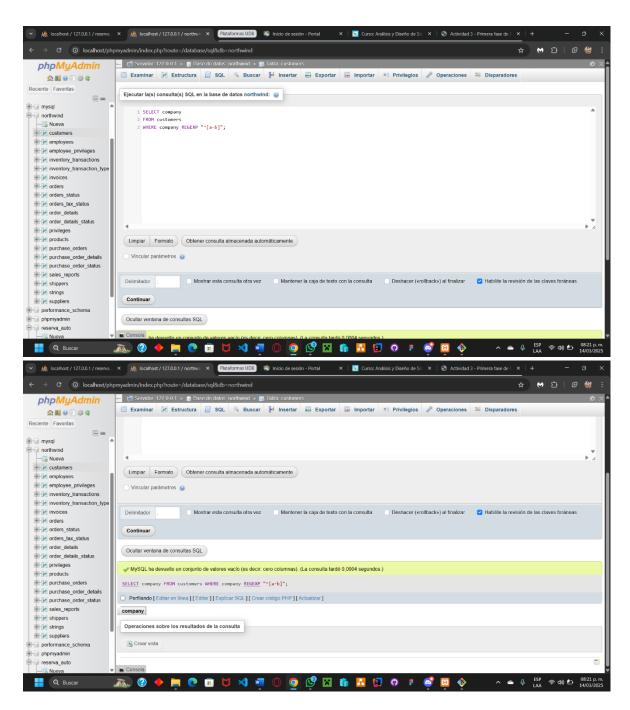

Que no funciona en MySQL, usamos la consulta

(SELECT company

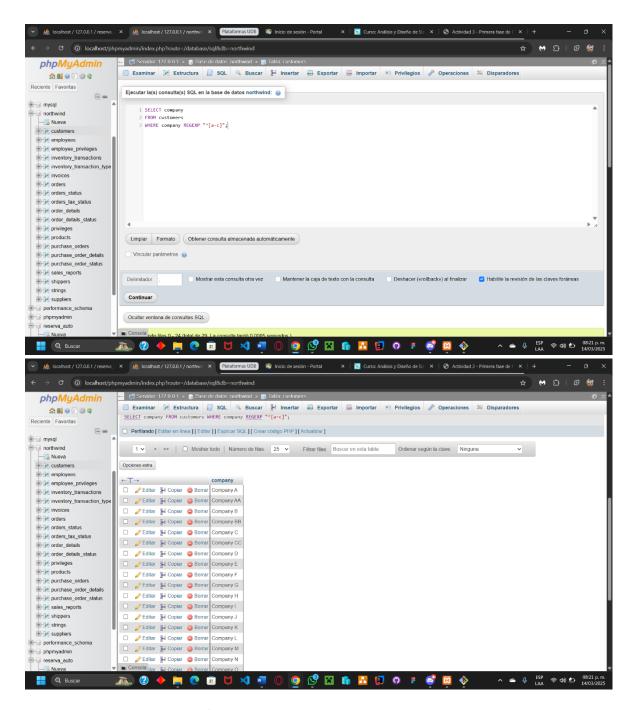

FROM customers

WHERE company REGEXP "^[a-c]")

Que hara la misma búsqueda y funcionara.

Ninguna compañía empieza ni con A ni con B

Todas las compañías empiezan por la letra C y es que por eso aparecen.
